Possibilities

We're on a mission

Our Commitment

Activ has been providing services to people with disability, their parents and carers since 1951. We are driven by the possibilities of what we can deliver on our mission – a better life.

A consistent motivator has been our commitment to help people with disability to new levels of confidence, independence, social interaction and enjoyment.

We are now a large, sophisticated operation with a care and support focus resourced by more than a thousand staff and volunteers. Activ today provides integrated services that profoundly benefit all aspects of the lives of people with disability.

Your Activ - at a glance.

Activ™ Business Services provides employment opportunities within a range of industries including timber processing, metal fabrication, textiles, specialty packaging and much, much more. Activ employs more than 1000 people with disability.

Activ™ People, Skills & Community helps people with disability in becoming members of their community. We do this by supporting individuals in social participation, increased independence, life-long learning and enhanced informal support networks.

These might include personal skills development and a range of therapies. People, Skills & Community also offers Post-School options to assist school leavers with entry into new careers.

Activ™ Accommodation Services provides quality accommodation and enhanced lifestyles for people with disability. Several hundred people with disability now live in Activ-built homes throughout metropolitan and regional Western Australia.

We offer three types of service: permanent accommodation, community support and out-of-home respite. New permanent homes are modelled on the cluster-home concept. This groups three modern homes around landscaped, shared gardens. These homes are seamlessly integrated into the broader community.

Activ™ Recreation Services is, effectively, the travel agent and tour organiser that make holidays and travel (local and international), and other quick break options possible for people with disability.

Activ™ Transport Services operates the biggest school bus fleet behind the Perth Transport Authority. Between its two bus fleets, Activ daily transports 800 individuals to their schools, workplaces and other venues throughout the state.

Activ™ Volunteers are a vital component of our ability to deliver our broad range of services. Our volunteers are particularly valued in helping us with our in-demand sitter services but they are equally valued across our entire service spectrum.

Activ™ Library has one of the largest information resources on disability in Australia. It covers all aspects from early childhood diagnosis to ageing issues.

The Future.

We have changed the landscape in the provision of services to people with disability, their parents and carers.

We will never stop growing and building on our heritage and we will continue to evolve to meet changing needs and demands.

Our mission is one without end, but it certainly comes with unique rewards.
