

Specialist Disability Accommodation (SDA) Journey

Specialist Disability Accommodation (SDA) Journey

Hours required for SDA

If you're wanting to explore SDA, you must have a housing goal in your NDIS plan. This goal needs to be attached to the following capacity building supports:

- 15 - 20 hours of capacity building funding for OT assessment

- 30 - 50 hours (pending complexity) of support coordination

- If assistive technology is required (e.g. wheelchair, hoist, commode or automation) this request is to be lodged at the same time as the application for SDA funding. The following is provided as a guide only and depends on the equipment required:
 - Hoist: 10 - 12 hours
 - Complex wheelchair: 12-15 hours
 - Commode: 6-8 hours

If you do not have a housing goal included in your plan and wish to apply for funding to explore SDA, you may need to request a plan review.

If you would like more information, need support with pre-planning, or have already secured SDA funding in your plan and want to take the next step, contact our Customer Engagement team on 08 9387 0555 or email customerengagement@activ.asn.au
